

Patch Release 40.0.0.1

The *PostalOne!* system Emergency Patch Release 40.0.0.1 was deployed January 26, 2015 to introduce software fixes to the system. This includes a correction to issues previously identified in a prior release. These Release Notes provide the contents of the release and affected subsystems.

1. ALL USERS	2
1.1 eInduction	2
1.2 Scan Based Payments	2

1. All Users

1.1 eInduction

The eInduction Shipping Summary Report has been updated to enable internal and external users to access detailed container results on jobs found by the report. Previously, a defect introduced in the January 25, 2015 PostalOne! system release, incorrectly prevented users from viewing container details when they clicked a job link on the eInduction Shipping Summary Report results page. 1.2 Scan Based Payments

The SBP profile process has been updated to properly handle the creation of new SBP profiles from Program Registration. A defect introduced in the January 25, 2015 *PostalOne!* system release caused the SBP profile creation process to fail during the setup of a new customer from Program Registration due to a missing scenario for existing profiles.
